

Manny Flores

Senior Systems Engineer · IAM & SaaS Operations

Pinole, CA · mannyflores1193@gmail.com · manny.wiki · linkedin.com/in/mannyflores11

SUMMARY

Senior Systems Engineer with 10+ years operating SaaS and identity infrastructure for fintech and healthcare. Specialize in the full user lifecycle at workforce scale: birthright access, automated provisioning and deprovisioning, role conversions, and rehires. Build automation in Python, Terraform, and Okta Workflows, and deliver audits across SOX, access reviews, and regulated e-communications.

CORE SKILLS

Identity & Access Management

Okta (Identity Engine, Workflows, Identity Governance) · OneLogin · SAML · OAuth 2.0 · OIDC · SCIM · JML automation · Birthright access · SSO

Automation

Python · Bash · PowerShell · Terraform · AWS Lambda · GCP · REST APIs · Webhooks · Zapier · Chrome extensions · Claude Code · Cursor · Gemini Enterprise

SaaS & Platform Administration

Google Workspace · Slack · Zoom · Atlassian (Jira, Trello, Confluence) · Coda · Box · DocuSign · Figma · Lucid · Adobe Creative Suite · Glean · SendSafely · 1Password · LastPass · Salesforce

Endpoint Management

JAMF · Kandji · Intune · Zero-touch deployment · macOS · Windows · ChromeOS

Audit, Security & Compliance

SOX controls · App access reviews · External audit support · E-comms surveillance · Service account audits · Disaster recovery testing

EXPERIENCE

Senior Systems Engineer

May 2022 – Present

Robinhood · Corporate Engineering (Enterprise Applications) · Menlo Park, CA

- **Team Leadership:** Lead the Corporate Systems team spanning Corporate Applications (primary domain), Corporate Endpoints, and Corporate Network. Instill structured project lifecycles (BRD, EDD, PRD, POC) for cross-team initiatives, mentor teammates across domains, and carry a rotational on-call schedule for identity and access incidents.
- **Identity & Access Management:** Designed and operate authentication flows in Okta using SAML, OAuth 2.0, and OIDC, plus SCIM for downstream provisioning. Own the full user lifecycle, including birthright access, automated provisioning and deprovisioning, rehires, role conversions, and service account ownership.
- **Identity Governance:** Led the rollout of Okta Identity Governance (OIG), building access certification campaigns and policy-driven lifecycle controls to centralize and automate access reviews across the enterprise.
- **M&A Integration:** Migrated identity and applications for Robinhood acquisitions (Say, X1, Bitstamp, TradePMR) into the central Okta tenant, consolidating SSO and access policy under the parent stack.
- **SaaS Administration:** Own enterprise applications end-to-end (purchasing, install, configuration, upgrades, access administration) across Google Workspace, Slack, Atlassian, Okta, Zoom, Box, and 1Password.
- **Automation:** Built provisioning integrations and scripts in Python, Okta Workflows, and CLI tooling that replaced manual access tickets with automated fulfillment.
- **AI Governance:** Partner on Corporate Engineering's AI governance program, reviewing and rolling out AI tools (Claude Code, Cursor, Gemini Enterprise) across engineering and the broader company, and reviewing and enabling MCP integrations for the SaaS stack.
- **Audit & Compliance:** Delivered audit responses across SOX controls, Okta access reviews, service account audits, Slack external audit logs, regulatory e-comms surveillance (GlobalRelay), and external Deloitte audits.

Senior Systems Network Administrator

Jul 2017 – May 2022

Health IQ · San Diego, CA · Multi-office and remote

- Owned IT and InfoSec across Mountain View, San Diego, Dallas, and a fully remote workforce, provisioning **800+ employee accounts** across the enterprise SaaS stack (Google Workspace, Okta, Salesforce, Slack, Zoom, Jira, and more).
- Led **SaaS account management and SSO rollouts** across Okta, LastPass, and OneLogin, consolidating logins and tightening access control.
- Built API and webhook integrations using **AWS Lambda, Zapier, IFTTT, and REST APIs**, plus custom Chrome extensions, to automate repetitive agent and IT workflows.
- Administered **NICE inContact and Five9** cloud contact-center stacks (Softphone, MAX Dialer, VoIP) for hundreds of agents.
- Implemented endpoint management and automation across macOS and Windows using **JAMF, Kandji, Intune**, and scripting (AppleScript, Bash, PowerShell).
- Established security training, baseline policies, and onboarding/offboarding programs across the organization.
- Stood up IT for new offices (power, ethernet, telepresence, VoIP, video conferencing) and led a small support team across the US and abroad.

EDUCATION

University of California, San Diego · Bachelor of Arts, Computer Science

2011 – 2017

LANGUAGES

Spanish (Native / Bilingual) · **English** (Full Professional)
